Residential Energy Code Technical Advisory Group Meeting Review Notes for May 6, 2022

Agenda Items	TAG Actions
Welcome and Introductions	Kjell Anderson, TAG Chair, called the meeting to order at 8:30 a.m. Roll was taken, and introductions made. Kjell laid out the meeting ground rules and meeting procedures.
	Patrick Hayes moved to require a roll call vote to establish an actual vote count. He then amended his motion to require the roll call vote only on items with at least one dissenting vote. Amy Wheeless seconded the motion. The motion failed, 6 to 10. It was noted that the chair or any member may request a roll call vote at any time.
Craig; Greg Davenport; *Kevin Jonlin; *John Lange; Henry Od	Anderson, Chair; Dave Baylon; *Chris Boroughs; Jason Carter; Wade Duell; Mike Fowler; Patrick Hayes; Gary Heikkinen; Luke Howard; Duane Dem; Irina Rasputnis; David Reddy; *Albert Rooks; *Lisa Rosenow; Andrea Storm; Gavin Tenold; Amy Wheeless

2. Review and Approve Agenda	The agenda was approved as modified. The proposals from Lisa Rosenow (071, 072, 089, 088 and 081) were moved up to be heard before 065. The proposals from Dan Wildenhaus were deferred to the next meeting.
3. Review and Approve Minutes	The minutes of the December 17, 2021, meeting were approved as written.
Review of Code Change Proposals	Note: Proposals 082, 033, 065, and 066 were deferred to the next meeting as their proponents were unavailable to present.
<u>084</u>	Duane Jonlin presented his proposals removing Group R-2 occupancy buildings from the residential provisions and moving them to the commercial provisions to better align the energy code with the rest of the model codes and provide regulatory consistency for this type of building.
	There was both support and opposition for this proposal from members. There was some concern about the division of Group R-2 occupancies based on method of access. There was some concern that there may be some correlation needed with other codes—specifically the commercial provisions and the existing building code—and the impact on the efficiency credits in both code provisions.

Patrick Hayes moved to amend the proposal to move all Group R-2 to the commercial provisions. David Reddy seconded the motion. The motion failed, 6 to 8 with two abstentions. The proposal was tabled, with a workgroup formed to discuss the concerns raised and how to address them. Discussion and how to address them. Lisa Rosenow presented her proposal regarding central water heating circulation pump requirements, moving the last sentence to the subsection for individual dwelling units and adding a subsection with specific requirements for Group R-2 to align with the requirements in the commercial provisions. Sean Denniston pointed out that Section R403.8 already requires systems serving multiple dwelling units to comply with the commercial provisions, so the added subsection is redundant. There was some discussion of removing Section R403.8, but in the end it was recommended that it be retained and the proposal modified. Greg Davenport moved to recommend approval as modified, removing the Group R-2 subsection and the exception allowing cold water piping return. Durace Jonilin seconded the motion. The motion carried with no opposing votes. 972 Based on the action on 071, Lisa Rosenow withdrew 072. Kevin Duell introduced his proposal adding exceptions for service hot water systems that meet the requirements of ANSI 221.40 and NEEA's Advanced Water Heating Specifications rather than DOE UEF requirements, which allows for condensing water heaters. While this is technically already allowed by the code, Kevin wanted it to be specifically spelled out and referenced in the standards. He is proposing it as an exception to skirt any preemption issues. The discussion was tabled until the May 13 meeting to allow the proponent time to provide information on available models and to amend the language for consistency with C406 Option 5.3. Kevin Duell introduced his proposal to remove "where installed" from the beginning of Section R403.5.2. There was some TAG discussion on the origin of the language, with people expre		
Lisa Rosenow presented her proposal regarding central water heating circulation pump requirements, moving the last sentence to the subsection for individual dwelling units and adding a subsection with specific requirements for Group R-2 to align with the requirements in the commercial provisions. Sean Denniston pointed out that Section R403.8 already requires systems serving multiple dwelling units to comply with the commercial provisions, so the added subsection is redundant. There was some discussion of removing Section R403.8, but in the end it was recommended that it be retained and the proposal modified. Greg Davenport moved to recommend approval as modified, removing the Group R-2 subsection and the exception allowing cold water piping return. Duane Jonlin seconded the motion. The motion carried with no opposing votes. 072 Based on the action on 071, Lisa Rosenow withdrew 072. Kevin Duell introduced his proposal adding exceptions for service hot water systems that meet the requirements of ANISI 221.40 and NEEA's Advanced Water Heating Specifications rather than DOE UEF requirements, which allows for condensing water heaters. While this is technically already allowed by the code, Kevin wanted it to be specifically spelled out and referenced in the standards. He is proposing it as an exception to skirt any preemption issues. The discussion was tabled until the May 13 meeting to allow the proponent time to provide information on available models and to amend the language for consistency with C406 Option 5.3. Kevin Duell introduced his proposal to remove "where installed" from the beginning of Section R403.5.2. There was some TAG discussion on the origin of the language, with people expressing concern that these systems were now required when this section was first adopted into the code. Mark Sniffen moved to recommend approval as submitted. Patrick Hayes seconded the motion. The motion carried, 7 to 5 with three abstentions. Nick O'Neil introduced his proposal that would require electric resistance w		commercial provisions. David Reddy seconded the motion. The motion
circulation pump requirements, moving the last sentence to the subsection for individual dwelling units and adding a subsection with specific requirements for Group R-2 to align with the requirements in the commercial provisions.
